Run Save Changes Updated, Saved 51

```
1 #include<iostream>
2 using namespace std;
3 class animal
4 {
5     public:
6     virtual void speak();
7 };
8 class cat : public animal
9 {
10 public:
11 void speak()
12 {
13     cout<<"cat-->meow\n";
14 };
15 class dog : public animal
16 {
17 public:
18 void speak()
19 {
20     cout<<"dog-->bow bow";
21 };
22 main()
23 {
24     animal *a[2];
25     cat c1;
26     a[1]=&c1;
27     dog d1;
28     a[2]=&d1;
29     a[1]->speak();
30     a[2]->speak();
31 }
```

Your INPUT go's here! Give only values. do not give like a=10

cat-->meow
dog-->bow bow

Questions

32. Create a base class called Employee with a virtual function calculatePay(). Derive two classes Manager and Engineer from the base class. Implement the calculatePay() function for each class.
